General Description

The Klein D2000-7CST, 9" Ironworker's Work Pliers are designed aid in the twisting of holding wire around rebar as well as to cut hardened wire, screws, and nails. The heavy-duty set of knurled jaws holds tight to the wire allowing the user to easily twist and turn. The closer fulcrum of the pliers easily handles the material eliminating the strain of the user and the added handle hook bend allows for a better grip. These non-insulated pliers are not designed for use with wire that is associated with high voltage or electrical applications.

Product Specifications
